Die vorgeschlagenen Pflanzen sind für den angegebenen Dachaufbau geeignet und dienen als Vorschlag. Der Verkauf der Pflanzen erfolgt in handelsüblichen Gebindegrößen (in Abhängigkeit der Pflanzengröße). Die Lieferung erfolgt solange der Vorrat reicht. Die Winterhärte ist unterschiedlich zu beurteilen und dem regionalen Klima anzupassen.

The suggested plants are suitable for the specified roof structure and are intended as a suggestion. The plants are sold in standard container sizes (depending on the plant size). Delivery takes place while stocks last. Winter hardiness must be assessed differently and adapted to suit the regional climate.

De voorgestelde soorten zijn geschikt voor de desbetreffende substraatdikte en zijn ter indicatie. De substraatdikte is afhankelijk van de potmaat en/of kluitgrootte. De levering is zolang de voorraad strekt bij de handelskwekerijen. (De voorgestelde vaste planten, heesters etc. zijn geen Optigrün producten). De winterhardheid is regio, dakhoogte, ligging en klimaat afhankelijk.
